

Sidepocket Band

Here's What We're About...

Whether you're having a corporate party, anniversary celebration, wedding, or just having a fun shindig, Sidepocket puts the dance into your party! We are expert at reading your crowd and adapting our set to keep them rocking. We also will play "conversational level" dinner jazz when you need it.

Professional Attitudes

Bandleaders Pamela Rose and Glenn Walters are well-loved and respected by the best catering managers and event planners in town. Early setup times, precise scheduling, and flexibility in the name of spontaneity are standard. Sidepocket always dresses and plans like the A list band we are proud of being,

Fun

We know how to play music with superb energy, passion, and joy. Check out our roster of players—you'll see why these world-famous musicians are in such high demand.

Flexible Band Size

We normally perform as a seven-piece band (drums, bass, guitar, keyboards, saxophones, and two lead vocalists). But we can make the band larger by adding a horn section, or smaller, depending on budget or space needs. Smaller jazz combos are also available.

Huge Song Selection

We play music from the 40s, 50s, 60s, 70s, 80s, and beyond! Check out our song list.

Sound and Lights

We have excellent pro sound gear, stage lights, and CD players for break music. It's all included in our standard fee.

Cocktail Music

We also have great players in the band that can set up in your cocktail area and play background jazz music. They're available as soloists, duos, and trios.

Late-Night DeeJay

Sometimes folks really want the warmth and fun of a live band, but would love a deeJay to take over for the last hour or so. Ask about our Band/DeeJay package.

Volume Control

Your band should be big energy without hurting anyone's ears. We know weddings have a wide age range of guests and are sensitive to volume issues. We never forget that this is your show, not ours!

For bookings and more information on the band, call: (415) 386-0935
